SUMMARY

Final-year Management Information Systems student seeking a Web Developer Internship to gain practical experience in a professional software development environment. Have experience building web applications using ReactJS, Node.js, ExpressJS, and MongoDB through personal projects. Eager to learn new technologies, solve real-world problems, collaborate with team members, and develop technical skills through hands-on experience.

EDUCATION

University of Transport Ho Chi Minh City – UTH 2023 - 2027

Management Information System

GPA: 3.39

SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), ReactJS, React Router DOM, Tailwind CSS, Material UI (MUI), Redux Toolkit, DnD Kit
Backend	Node.js, ExpressJS, REST API, Socket.IO
Database & Authentication	MongoDB, JWT
Tools & Services	GitHub, VS Code, Postman, Cloudinary
Soft Skills	Communication skills, Problem-solving, Calm under pressure, Analytical and critical thinking, Deadline management

PROJECTS

TRELLO CLONE - TASK MANAGEMENT APPLICATION 2025 - 2026

Fullstack Developer

Project Description: Developed a web-based task and project management application inspired by Trello, empowering users to visually organize tasks using the Kanban methodology.

Tech Stack:

- **Frontend:** React.js, Vite, Material UI (MUI), Redux Toolkit, dnd-kit.
- **Backend:** Node.js, Express.js, MongoDB (Native Driver), JWT.
- **Services:** Socket.IO, Cloudinary (Image storage), Brevo/Resend (Email).

Key Features & Achievements:

- **Seamless Drag & Drop:** Built complex drag-and-drop interactions for Columns and Cards using the @dnd-kit library, automatically updating positions and recalculating display orders.
- **Real-time Updates:** Integrated WebSockets (Socket.IO) to instantly synchronize changes (adding/editing/deleting/moving cards) across the UI for all users concurrently accessing the same board.
- **State Management & UI/UX:** Centralized state management utilizing Redux Toolkit. Designed a user-friendly, responsive interface with Material UI, including support for Light/Dark mode.
- **Authentication & Security:** Implemented a secure login/registration flow using JWT (JSON Web Token) and encrypted passwords with bcrypt.

- **Database:** Designed an optimal MongoDB Schema for querying nested data structures effectively (Board contains multiple Columns, Column contains multiple Cards).

TOMATO TODOX - TASK MANAGEMENT APP 9/2025 - 11/2025

Fullstack Developer

Project Description: A modern Task Management application featuring full CRUD capabilities, multi-dimensional data filtering, and real-time statistics tracking, built with the MERN stack and Tailwind CSS.

Tech Stack:

- **Frontend:** React (Vite), Tailwind CSS, Radix UI.
- **Backend:** Node.js, Express.js.
- **Services:** MongoDB (Database), Vercel

Key Features & Achievements:

- Developed a full-stack, responsive web application for task management with a RESTful API architecture.
- Implemented comprehensive CRUD functionalities, along with multi-dimensional filtering (by Active/Completed status and Today/Week/Month timeframes).
- Optimized backend performance by utilizing MongoDB Aggregation Pipelines ($facet) to simultaneously fetch tasks and calculate real-time statistics in a single database query.
- Built a modern, interactive UI using React, Tailwind CSS, and Radix UI, integrating client-side pagination and real-time toast notifications for enhanced user experience.
